Summary

A highly focused and motivated web developer. I enjoy finding solutions to a varying number of challenges and have an excellent understanding of how the latest technologies can be used. I'm a quick learner and being flexible means, I can adjust in any environment.

Experience

MERN DEVELOPER (Final Year Project)**Quick Response Feedback System**

- Developed the Web application by RESTful API with Nodejs and Frontend with React.js and Mobile application with React Native.
- System is used for reporting problems and submitting feedback by users and reviewing problems by administration and providing feedback on their problems and will be deployed as Software as a Service.

Blockchain Real Estate Market Place (BREMP)

- Software-as-a-Service Solution that will provide modules needed to manage the real estate transaction within housing society and between all stakeholders i.e. Agents, partners, brokers. This solution will facilitate title companies (housing societies), brokers, and agents. Our system will manage buying, selling, transfer of real estate properties.
- Developed the Web application with MERN Stack.
